

A Complete solution from Zoeller and FAUN with the CV Show Team

Part of the Zoeller and FAUN team at the CV Show.

The Zoeller and FAUN team were out in force at the CV Show in April. Managing Director, Simon Hyde says, "With our product range and our joint philosophy, we can offer excellent service and a complete solution for the British waste collection and sweeper market." The team were on hand to discuss the Zoeller Rotary Alpha mounted onto the curved body FAUN VARIOPRESS II and the FAUN VIAJET sweeper. The stand was extremely busy over the three days with the sweeper being a real attraction. "The sweeper will be very busy over the coming months with demonstrations booked on stand and requests flooding in," says Simon. To book your sweeper, refuse collection vehicle and lifter demonstration call 01248 725304.

Walker our Irish Connection

One of the fleet of 350 Walker "Specialist fleet hire range" branded FAUN POWERPRESS REL.

In 2004, National Sweeper Sales and Plant merged with Walker Vehicle Rentals utilising their obvious synergies and experience in the Commercial Vehicle Rental / Contract Hire and Municipal Vehicle Sales and Service Market. "We have been selling FAUN vehicles very successfully to the Irish waste market with National Sweepers, by merging with Walkers their market reach has increased," says Stuart Collett, Zoeller and FAUN Commercial Sales and Marketing Manager. Walker Municipal Vehicles represent some of the largest manufacturers of municipal equipment in Europe including, FAUN and as a sub dealer for Zoeller Lifts. They have a commercial fleet of over 350 vehicles with head quarters and service centre in Dublin. In January 2008, Walkers opened another new purpose built depot in Rathcormac, Co Cork. The new 8000 sq ft facility is fully equipped to service all types of commercial vehicles ensuring a first class service and parts back up for all customers throughout Ireland. "FAUN and Zoeller products meet the needs of the Irish market and sales are predicted to grow by 20% in 2008/9," says Stuart.

SITA VARIOPRESS and FRONTPRESS

SITA Calderdale

SITA has placed orders for the Zoeller and FAUN product that will be working on Calderdale Council's new seven year contract. The contract, with a possible one year extension, will begin on 1st August 2008. Providing improved recycling and refuse collection service for 192,400 residents.

The initial order, 18 refuse collection vehicles (RCVs), is for 6 FAUN VARIOPRESS 14.5 cubic metre narrow bodies, 9 FAUN 22 cubic metre bodies and 3 FAUN 9 cubic metre narrow bodies. The small RCVs, FAUN VARIOPRESS 9 cu m, have Zoeller 202.60 lifters. The larger RCVs, FAUN VARIOPRESS 14.5 cu m, have either Zoeller Omega 249 or Zoeller split Rotary lifters. The largest RCVs, FAUN VARIOPRESS 22 cu m, have Zoeller split Rotary lifters for the collection of domestic waste, wheeled bin service.

James Griffin, Fleet Development Manager for SITA UK, says, "The Calderdale contract continues to strengthen our business growth in the UK." FAUN VARIOPRESS vehicles are working on many SITA contracts including Rochford District Council and Epping Forest District Council. In addition SITA use FAUN FRONTPRESS and VARIOPRESS to collect industrial and commercial waste throughout the UK. "The VARIOPRESS works consistently well on our contracts and is the right vehicle to support the Calderdale contract," says James.

The FAUN POWERPRESS REL is the solution for bulk waste collections, commercial and industrial requirements. Proven technology is combined with the highest material specification. Durability can be found in the hard wearing swinging links for the carrier and packer plates, high tensile steel and full penetration welding.

The integral FAUN lifter has an extremely low rake height, skip arms, and can cope with a variety of containers up to 16 m³. For maximum compaction the tailgate initially pre-compacts the waste against the front of the hopper, prior to being pressed in the body. The compaction in the vehicle body is even which allows for smooth and fast discharge with emptying taking place in 30 seconds. Pictured here is a POWERPRESS REL with a 29 cubic metre body mounted onto an 8 x 4, 32 tonne chassis with a FAUN Combi lifter, which enables the operator to empty wheeled bins in addition to REL skips.

Zoeller Triple

The Zoeller Triple is a front line lifter that is designed especially for twin compartment compaction vehicles. The lifter is ideal for the collection of wheeled bins and refuse sacks on collection rounds where dual stream recyclables or the dedicated collection of recyclables & residual waste is required. This flexibility means that recyclables and domestic waste can be picked up at the same time, assisting users to meet their demanding recycling targets. Bob Billington, General Manager at Zoeller says, "Recent orders for 10 Zoeller Triple lifters from WCR Vehicle Hire Ltd show that they are keen to offer flexibility to their customers. This reflects the modern demands for recycling and the collection of different waste streams in sacks or wheeled bins."

Proven Purple Power

POWERPRESS REL body size is available from 18 cu m to 30 cu m.

24 FAUN Vehicles on Display at IFAT

Dr Johannes F. Kirchhoff, Chairman of the IFAT Advisory Board and Managing Director of FAUN Umwelttechnik says, "IFAT has once again proved its role as the world's leading trade fair for the waste sector." For waste and recycling professionals the IFAT fair is ideal to hunt out new innovations and discuss international developments. The setting for the fair is wonderful, the city of Munich offers excellent hospitality and environment that contributes to a very positive experience.

"For my team and myself, IFAT was very successful and it can be described as one of the best trade fairs of all time," says Dr Kirchhoff.

CIWM Exhibition North Green Stand N48a

FAUN is bringing their new curved body VARIOPRESS II fitted with the Zoeller Rotary Alpha lifter and the FAUN ROTOPRESS to the CIWM Exhibition, Torquay 10th -12th June 2008 North Green stand N48a.

The research and development departments of Zoeller and FAUN work together in Germany, France and the UK to innovate the latest refuse collection body, lifter design and technology. For the collection of green garden waste ROTOPRESS is the only vehicle on the market that has been designed and developed especially for this purpose. The challenge for all waste managers is to find the best solution for their collection needs. ROTOPRESS is not an adapted vehicle but the right vehicle for green waste. Zoeller and FAUN have a range of innovative vehicles to meet the needs of a demanding market. Come meet the team to discuss your vehicle and lifter needs.

Developed for the collection of green waste the unique rotating action of the ROTOPRESS body aids the mixing and composting process.

VARIOPRESS Mobilised for Southampton

The FAUN team has successfully delivered nine new waste vehicles to Southampton City Council's Waste and Fleet Transport Team. The Variopress vehicles will now be seen, adorned with creative recycling artwork, driving around the city picking up thousands of tonnes of refuse and recyclable goods. "This is a new relationship that we are successfully building with Southampton," says Christine Foxley, FAUN Area Sales Manager, "To get the job done correctly we called a mobilisation meeting with Southampton and all the parties involved."

The Zoeller and FAUN service team worked on an action plan for delivery to make sure the vehicles fit with the waste team requirements. "We always implement the A to Z of vehicle delivery to ensure all goes smoothly," says Phil Roberts, Zoeller and FAUN Service Manager.

Dave Bone, Fleet Hire and Administration Manager at the council, said he was impressed with both the products and the service from FAUN. "We were very impressed by the FAUN manufacturing facility, the larger European group and the partnership that we could forge," said Dave.

Andy Coles, Zoeller and FAUN Service Engineer, said: "The important work begins the day a vehicle goes out on its round, I have been with every vehicle on day one and the service team is there for the whole of the vehicles life."

FAUN VARIOPRESS 20 cu m body mounted on Eonic 6 x 2 rear steer, 26 tonne chassis.

Zoeller and FAUN will be attending the RWM exhibition at NEC Birmingham 16th – 18th September 2008 Outside Hall 19 Stand OA164
